Kari

It has been a pleasure
having this school year.
It is a pleasure having
sweet, nice young
ladies in class. Even
though you are a "Gum addict,"
Best wishes in years to come.
Bonnie Davis

Kari,
It's been my honor
to teach a class full of
good people like yourself.
May rich blessings and
good fortune that you
will make yourself follow
you always.
Robert Colby

Kari:

Best Wishes goes out
to you. Though I feel
you have greater potentials
than you have revealed;
I feel you have accomplished
quite a lot and it's been fun
having you in my class.

For those that bother to read what's written on this page I would like to say that we, of the annual staff, hope you have as much fun looking at it as we had putting it together, and we had a blast. Sure we had some headaches and some bad days but as we view the finished product we know its all been worth it, and I hope you feel the same way. Ya'll stay cool and I feel sure that you will succeed in everything you attempt.

Dear Students:

Those people who are happy in school and in life are those who are successful. They give their best to their work, their activities, their school, and their community. Success comes through the achievement of predetermined goals. It is my hope that Terrell High School has assisted you in arriving at worthwhile goals for your life.

May each of you experience the happiness that comes as the result of a job well done.

New faces greet us each year - adding to the number who make up our school community. As each of you leave, try to remember the educational contributions you shared during the years spent at Terrell High School.

I am sure the faculty joins me in saying: "We hope we have counseled you in a manner that will be of great benefit in your future."

SAVING TIPS

on electric air conditioning

Air conditioning provides lots of comfort during the summer months, but for many thousands of homeowners it is also the biggest factor in the cost of electricity. On the average, air conditioning accounts for about half of summertime electric bills.

Here are ways you can hold down the cost of air conditioning and still enjoy its comfort.

Central Systems

1. Set thermostat on 78°, or higher, during the summer. Turn unit off if you'll be away from home several days.
2. Keep equipment at top operating efficiency. Have it checked seasonally by qualified serviceman.
3. Check filter every 30 days. Dirty filters cause equipment to use excessive electricity. If filter is permanent, clean by manufacturer's directions; if it's disposable, it should be replaced when dirty.
4. Keep furniture, draperies away from air outlets and returns. Clean grills often.
5. Close draperies and blinds to keep out direct sunlight.
6. Keep fireplace damper closed.
7. Proper home insulation keeps the heat out, cuts energy use. Insulation questions? Call TP&L.
8. Shade on roof and walls can reduce energy needed to cool. But trim trees, shrubs away from outside compressor unit. Keep it free of leaves, debris. If air flow is blocked, unit uses more energy.

TEXAS POWER & LIGHT COMPANY
A tax-paying, investor-owned electric utility

9. Weatherstrip doors and windows; caulk cracks to prevent drafts and cool air loss.
10. Keep windows closed. Open outside doors as little as possible.

Window Units

Follow above suggestions, plus these:

11. Buy units with *highest* "energy efficiency ratio" (EER). Uses less electricity to cool. If EER is not on sales tag, ask for it or figure it yourself. Divide "wattage" into "BTU" capacity. Both figures are on unit.
12. Place unit where it'll get as little direct sun as possible.
13. Aim air outlets at lower half of doorway to next room to allow warm air from that room to enter at the doortop for recooling, recirculation.
14. Never vent air conditioner into garage. Ventilation is usually too poor for top performance of your unit.

Conserve electricity and you help conserve one or more of the fuels needed to produce it. Conserve fuels and you help assure that there will be enough to meet essential needs for electricity in the future.

When you pass a TP&L office, warehouse, generating plant or other facility, you'll see that we've turned off all non-essential lighting. And, in as many other ways as possible, TP&L is reducing its own uses of electricity.

If you would like additional information on conserving electricity, call the Customer Service Representative in the TP&L Office.
